Текущие клинические исследования

Выводы

- В досье собрано 27 клинических карточек.
- По статусам: COMPLETED: 24, TERMINATED: 2, Completed: 1.
- Зафиксированные фазы: Phase 3, Phase 2, Phase 1, Phase 4.
- У 25 исследований есть выделенный вывод или conclusion.
- Признак присутствия в РФ выделен у 4 исследований.

Карточки исследований

- NCT00097357; BMS-562247 in Subjects Undergoing Elective Total Knee Replacement Surgery; статус: COMPLETED; фаза: Phase 3; география: Argentina, Australia, Canada, Denmark; вывод: # ClinicalTrials.gov (ctgov_results) NCT ID: NCT00097357 Title: BMS-562247 in Subjects Undergoing Elective Total Knee Replacement Surgery OverallStatus: COMPLETED Phase: Start: 200
- NCT00320255; A Phase 2 Pilot Study of Apixaban for the Prevention of Thromboembolic Events in Patients With Advanced (Metastatic) Cancer; статус: COMPLETED; фаза: Phase 2; география: Canada, United States; вывод: # ClinicalTrials.gov (ctgov_results) NCT ID: NCT00320255 Title: A Phase 2 Pilot Study of Apixaban for the Prevention of Thromboembolic Events in Patients With Advanced (Metastatic)
- NCT00371683; Study of Apixaban for the Prevention of Thrombosis-related Events Following Knee Replacement Surgery; статус: COMPLETED; фаза: Phase 3; география: Argentina, Australia, Brazil, Canada; вывод: The available results snippet for NCT00371683 does not include outcome data or a results-based interpretation, so no study conclusion can be supported from the provided evidence.
- NCT00412984; Apixaban for the Prevention of Stroke in Subjects With Atrial Fibrillation; статус: COMPLETED; фаза: Phase 3; география: Argentina, Australia, Austria, Belgium; вывод: Completed Phase 3 randomized double-blind active-controlled study of apixaban versus warfarin for stroke prevention in atrial fibrillation; no study outcome results were included i
- NCT00496769; Apixaban in patients with atrial fibrillation; статус: COMPLETED; фаза: Phase 3; география: United States, Argentina, Australia, Austria; вывод: Apixaban was superior to aspirin for stroke prevention in patients with atrial fibrillation who were unsuitable for vitamin K antagonist therapy, with a favorable overall safety pr
- NCT00633893; Efficacy and Safety Study of Apixaban for Extended Treatment of Deep Vein Thrombosis or Pulmonary Embolism; статус: COMPLETED; фаза: Phase 3; география: Argentina, Australia, Austria, Brazil; вывод: No results-based conclusion can be supported from the provided NCT00633893 snippet because it only shows the study title and status, without any outcome data or result comparisons.
- NCT00787150; A Phase 2 Study To Evaluate The Safety Of Apixaban In Atrial Fibrillation; статус: COMPLETED; фаза: Phase 2; география: Japan; вывод: The available results snippet for NCT00787150 does not provide enough outcome data to support a results-based conclusion about apixaban's safety in atrial fibrillation.
- NCT01885585; Eliquis Regulatory Post Marketing Surveillance (rPMS); статус: COMPLETED; география: South Korea; вывод: # ClinicalTrials.gov (ctgov_results) NCT ID: NCT01885585 Title: Eliquis Regulatory Post Marketing Surveillance (rPMS) OverallStatus: COMPLETED Phase: Start: 2014-07 | Primary Compl
- NCT02034591; Phase 1 Oral Solution and Crushed Tablet Relative Bioavailability Study of Apixaban When Administered Through a Nasogastric Tube in Healthy Subjects; статус: COMPLETED; фаза: Phase 1; география: United States; вывод: # ClinicalTrials.gov (ctgov_results) NCT ID: NCT02034591 Title: Phase 1 Oral Solution and Crushed Tablet Relative Bioavailability Study of Apixaban When Administered Through a Naso
- NCT02048865; Apixaban for the Prevention of Venous Thromboembolism in Cancer Patients; статус: COMPLETED; фаза: Phase 2; география: Canada; вывод: # ClinicalTrials.gov (ctgov_results) NCT ID: NCT02048865 Title: Apixaban for the Prevention of Venous Thromboembolism in Cancer Patients OverallStatus: COMPLETED Phase: Start: 2014
